

Md Abul Kalam Azad

New York, NY • (347) 837-9863 • azadmd.tech@gmail.com • [LinkedIn](#) • [GitHub](#)

EDUCATION

Queens College, City University of New York (CUNY) — Flushing, NY

Expected Graduation: Dec 2026

Bachelor's in Computer Science

Relevant Coursework: Data Structures & Algorithms, Design and Analysis of Algorithms, Operating Systems, Database Systems, Software Engineering, Object-Oriented Programming (Java/C++), Computer Architecture, Theory of Computation, LLMs & AI Agents

SKILLS

- **Languages:** Java, C++, JavaScript, SQL
- **Web & Backend:** Node.js, Express, MongoDB (Mongoose), HTML, CSS, EJS, Bootstrap, REST APIs, AI API integration (Google Gemini)
- **Tools:** Git, GitHub, VS Code, Eclipse, IntelliJ IDEA
- **Concepts:** Data Structures, Algorithms, Object-Oriented Programming, Time & Space Complexity Analysis
- **Certifications:** Anthropic — AI Fluency: Framework & Foundations; Claude 101

PROJECTS

CSTutor — AI-Powered CS Tutoring Web App

Jun 2026 – Present

Node.js, Express, MongoDB, EJS, Google Gemini API | github.com/mdaazad/cstutor • Live: cstutor.onrender.com

- Built a full-stack web app where students ask CS questions and receive AI-generated explanations via the Google Gemini API
- Identified and fixed a stored XSS vulnerability by rendering AI-generated Markdown as sanitized HTML using marked and isomorphic-dompurify
- Implemented session-based user authentication with bcrypt password hashing, keeping the dashboard protected behind login
- Modeled users and question/answer history in MongoDB with Mongoose (full CRUD); deployed to Render using environment variables for database, session, and API credentials

Java Data Structures & Algorithms

Jan 2026 – Present

Java | github.com/mdaazad/java-data-structures-algorithms

- Implemented singly and doubly linked lists from scratch using object-oriented design to study data structure behavior and performance trade-offs
- Built core operations — insertion, deletion, traversal, reversal, and position-based updates — with attention to runtime
- Used a dummy head node and tail pointer to simplify edge cases and speed up end insertions/deletions; documented time and space complexity per operation

Personal Portfolio & Resume Website

Live via GitHub Pages

HTML, CSS, JavaScript, Bootstrap | github.com/mdaazad/digital-resume-website

- Designed and built a responsive multi-page portfolio site showcasing projects, skills, and coursework
- Added interactive features such as a dark/light mode toggle using JavaScript DOM manipulation; deployed via GitHub Pages

EXPERIENCE

Uber Technologies, Inc. — New York, NY

Nov 2016 – Present

Independent Driver/Partner

- Maintained a 5.00 rating over high-volume service, demonstrating reliability, customer focus, and problem-solving in a fast-paced environment

LEADERSHIP & AFFILIATIONS

Peer Study Sessions — Self-Organized

Feb 2025 – May 2025

- Organized and facilitated 10+ weekly study sessions on Data Structures and Algorithms with classmates, helping peers build confidence and mastery of core concepts
- Guided peers through challenging topics — recursion, debugging, and algorithmic reasoning — breaking down hard ideas for students at different levels

NSF S-STEM Scholar — Queens College

Aug 2025 – Present

Dean's List — Queens College

Fall 2024, Spring 2025

Queens College Ambassador

Feb 2026 – Present

- Guide campus tours for prospective students; explain facilities and programs, answering questions on the spot

Code for All

Aug 2022 – Present
